- For further information about these and related statistics, contact Bill Markham on Sydney (02) 9268 4376 or e-mail at bill.markham@abs.gov.au or contact any ABS office. For information about other ABS statistics and services, refer to the back cover of this publication.

GENERAL

This publication has been enhanced to incorporate relevant data from the now discontinued publication *Monthly Summary of Statistics, NSW* (Cat. no. 1305.1) (final edition December 1997).

This enhanced publication provides information on a wide range of economic indicators which are the latest available at the time of publication. In a number of cases, figures appearing in this summary are preliminary and are subject to revision in subsequent issues.

SEASONAL ADJUSTMENT AND TREND ESTIMATION

Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from a series so that the effects of other variations on that series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present. This means that movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. Smoothing seasonally adjusted series produces a measure of the underlying trend by reducing the impact of the irregular component of the series. This smoothing technique does result in revisions to the most recent estimates as additional observations become available. For an explanation of seasonal adjustment derivation, refer to the publication *Seasonally Adjusted Indicators* (Cat. no. 1308.0).

STANDARD ERRORS OF ESTIMATES

One measure of the variability which occurs as a result of surveying only samples of the total business population is the standard error. There are about two chances in three that a survey estimate is within one standard error of the figure that would have been obtained if all businesses had been included, and about 19 chances in 20 that it is within two standard errors. The standard error can also be expressed as a percentage of the estimate and this is known as the relative standard error (RSE).

For detailed explanatory notes and definitions for the items shown in this publication, readers are referred to the specific ABS publications.

Current publications produced by the ABS are listed in the *Catalogue of Publications* (Cat. no. 1101.0). A *Release Advice* (Cat. no. 1105.0) is issued on Tuesdays and Fridays which lists publications to be released in the next few days. These publications are available from any ABS office.

SYMBOLS AND OTHER USAGES

.....

kWh	kilowatt hour
teraJ	terajoule
n.a.	not available
n.p.	not available for publication but included in totals where applicable
n.y.a	not yet available
r	figure or series revised since previous issue
..	not applicable
—	nil or rounded to zero
—	break in continuity of series (where a line is drawn across a column between two consecutive figures)

NSW OVERVIEW

.....

EMPLOYMENT

Employment rose slightly by 0.1% in NSW in December 1997 to a seasonally adjusted figure of 2,842,300. National employment decreased by 0.1% over the same period.

UNEMPLOYMENT

Seasonally adjusted unemployment fell by 5.8% in December 1997 to 224,600. The unemployment rate in NSW was 7.3% in December 1997, down from 7.7% the previous month. The national unemployment rate was 8.1% in December 1997.

NEW MOTOR VEHICLE REGISTRATIONS

In seasonally adjusted terms, new motor vehicle registrations in NSW decreased by 0.7% from 21,650 in October 1997 to 21,507 in November 1997.

BUILDING APPROVALS

The seasonally adjusted number of new dwelling units approved in NSW in November 1997 was 4,507, an increase of 9.6% on the previous month and 13.1% higher than in November 1996.

RETAIL

In seasonally adjusted terms, total retail sales for NSW in November 1997 was \$3,961.5 million, an increase of 0.2% compared to the previous month.

FINANCE

The value of housing finance commitments for owner occupation in November 1997 was \$1,771.4 million, down 6.3% from the previous month. However, there has been a 9.7% increase on November 1996.

MAIN FEATURES

.....

RETAIL

In November 1997, seasonally adjusted total retail sales for NSW was \$3,961.5 million. This represented a slight increase (0.2%) on the previous month's figure of \$3,953.4 million. When compared to November 1996 the increase was more substantial at 3.3%.

Of all retail industry groups, the Food retailing group (\$1,536.7 million) made the largest contribution (38.8%) to total retail sales. Hospitality and services followed with a contribution of 19.4%. While the figures for most retail industry groups showed increases on the previous month, Household goods retailing and Recreational goods retailing declined.

Nationally, total seasonally adjusted retail sales in November 1997 was \$11,241.1 million, an increase of 0.8% on the previous month and 5.7% on November 1996. For NSW, Food retailing made the largest contribution (40.4%) to total retail sales at the national level. Retail sales for NSW represented 35.2% of total national retail sales.

FINANCE

The seasonally adjusted estimate for the value of housing finance commitments in NSW was \$1,804.5 million in November 1997, a fall of 4.2% from October. This was the first fall in this series since July 1997, although it is 13.1% higher than in November 1996.

In original terms, there was a fall in all components of housing finance for NSW. The value of finance approved for the construction of dwellings fell 10.2% to \$201.1 million, the purchase of newly erected dwellings was down 0.7% to \$110.0 million and commitments for the purchase of established dwellings decreased 4.3% to \$1,198.4 million. The refinancing of existing dwellings also fell 13.4% to \$261.8 million.

The average borrowing size in NSW in November 1997 was \$140,300. This is up by 11.6% from the average of \$125,700 twelve months earlier.

Nationally, the seasonally adjusted value of commitments fell by 2.3% to \$4,533.7 million in November 1997, the first fall in the national series since July 1997. However, this is 14.9% higher than in November 1996.

^a Most figures in this table have been revised since the previous issue.

^b Excess of live births over deaths.

^c For dates prior to June 1996, differences between the total increase shown and the sum of the natural increase and net estimated migration arise from retrospective adjustments to population estimates (which are made after each Census) to compensate for any intercensal discrepancy. A description of intercensal discrepancy is contained in the ABS information paper Demographic Estimates: Concepts, Sources and Methods (Cat. no. 3228.0).
